

Electroporation cuvettes

- Price Offer -

These Electroporation cuvettes are designed to maximize molecular electroporation and electrofusion efficiencies for Bacteria, Yeast, Insect, Plant and Mammalian cells. Each batch of cuvettes has to undergo rigorous testing at several stages during the manufacturing process for engineering tolerances, biocompatibility and sterility, prior their being Quality tested for optimal and reproducible impedance measurements.

- **COMPATIBILITY**

The cuvettes are compatible with most electroporation systems

- **BIO-CONTROLLED**

All batches are checked to optimize the Bio and Transfection compatibility, with stringent use of high quality grade polycarbonate and High grade chemicals to ensure consistent uniform pulse generation and improved gene transfer.

- **HIGH TOLERANCE MOULDING**

The moulding process ensures extremely high tolerances so that the electrodes have a consistent gap and parallel configuration. The electrodes are also cleaned chemically and physically to fully optimize the cuvette for high transformation efficiencies.

- **CAP DESIGN**

The cap has been designed to improve aseptic handling techniques, while the lip and positive seal reduces potential aerosol and contamination issues. Available in 1mm, 2mm and 4mm gap sizes with individual color caps.

- **STERILE PACKAGED**

Every cuvette is guaranteed sterile, packed using gamma irradiation and has a simple tear wrapper for easy access when you need it.

- **LOW DEAD VOLUMES**

All 1mm and 2mm cuvettes have a tapered V bottom so that reduced sample volumes can be used while aiding sample pick up and minimizing dead volumes

ORDERING INFORMATION

Catalogue No	Description	Listprice, excl VAT	Special offer price, excl VAT
02-2010-CP	50 X 1mm cuvette individually wrapped and sterile	CHF 158.-	CHF 135.-
02-2020-CP	50 X 2mm cuvette individually wrapped and sterile	CHF 158.-	CHF 135.-
02-2040-CP	50 X 4 mm cuvette individually wrapped and sterile	CHF 158.-	CHF 135.-

For research use only

Special offer valid until 30.6.2019
